

StackLeaps

60 days. Done-for-you outreach and booked introductions with the organisations that bring groups to Bosnia & Herzegovina - and buy your itinerary instead of dictating their own.

PRESENTED TO	PRESENTED BY	ENGAGEMENT
Nermin Numić	Peretz Levinov	60-day pilot
.Cheyf · Sarajevo	StackLeaps	September start

Where you stand

☑ What you already have

- A premium, deliberately slow product - small groups, signature tours, and a brand that means something locally
- ~30 personalised itineraries last year, closing 95-99% of the people who take the video call
- Guests booking a third and fourth time, plus a German-speaking audience built organically on social and long-form video
- An operation that finally runs without you - and a guide you trust, with days to fill

🕒 The opportunity

You've deliberately stayed away from the agencies that push the price down, hand you their own itinerary, and hold your hotel space with no guarantee of volume. That was the right call for the brand. It also meant the only repeatable B2B channel stayed shut.

We open a different door: organisations that bring their own people and buy *your* programme - NGOs, foundations, companies, and educational and study-travel organisers - plus the small-group specialist operators that genuinely fit a premium, slow-travel brand.

You already close almost everyone who gets on a call with you. The constraint was never your selling - it's how few of those calls exist.

PROOF · THE CAMPAIGN YOU SAW ON OUR CALL

"Same engine we ran for our own Balkan Wanders DMC."

1,200	38	7
CONTACTED	GENUINELY INTERESTED	BOOKED CALLS · 10 DAYS

TWO CONVERTED INTO REPEAT PARTNERS - ONE IS RUNNING FOUR SEPARATE ITINERARIES WITH US IN A SINGLE SEASON.

What we do

We do all the outreach for you - finding the right organisations, writing the emails in German and English, handling the replies - and book the introductions on your calendar. Your side stays light: one kickoff call, approve the shortlist, then take the introductions. Four stages:

PHASE 01

Weeks 1-2

Setup & infrastructure

Get the engine ready to send.

- Purchase the domains and mailboxes you'll send from - registered in your name
- Stand up the deliverability stack
- Run a warmup so inboxes land in primary, not spam
- If we ever part ways, the domains and mailboxes transfer to you

PHASE 02

Weeks 1-2

Partner Match Report

Qualify and narrow until the audience is unmistakably yours.

- Define your ideal partner - NGOs, foundations, corporates, educational organisers, brand-fit operators
- Find the actual decision-makers behind each organisation
- Hand you the top 50 best-fit contacts to review
- Nothing is sent until you've approved the list

PHASE 03

Weeks 3-6

Finding the best angle

Send slowly, learn fast, keep only what converts.

- Build 3-5 message angles - including Building Bridges Through Tourism as its own angle
- Test German-language and English outreach separately
- Measure reply quality, not just open rates
- Scale the winning angle to your capacity - never past it

PHASE 04

Week 7 onward

Booked calls, at your pace

Paced to your guide's capacity. Real conversations on your calendar.

- Roll the winning angle out - throttled to what you can actually deliver
- Replies handled in your voice and tone, in the prospect's language
- Booking + reminder sequence so the calls actually happen
- Retarget the pool every 3 months - timing is most of why people reply

FROM APPROVAL TO BOOKED

Inclusion / Exclusion

INCLUDED	NOT INCLUDED
• Partner Match Report - 50 best-fit contacts, your approval before anything sends • Outreach to NGOs, foundations, corporates, educational organisers and brand-fit specialist operators • Outreach written in German and English • Email infrastructure - domains, inboxes, warmup, deliverability - registered in your name and transferable to you • Replies handled in your voice and tone • Booking + reminder sequences • Exclusivity - while you're a client, we won't take on a new competing Bosnia & Herzegovina DMC	• The introductory call itself - you take it, and that's where you close 95% • Itinerary building and post-call follow-up • Website, brand, SEO or social work - that side already works • Price-driven mass-market agencies that impose their own itineraries - deliberately out of scope • B2C guest acquisition - this engine is B2B only • Partnership / equity / revenue-share - open to revisit later

Process & timeline

You said no decision before 1 September, and that's the right call mid-season - this timeline assumes it. Two weeks of warmup plus a couple of months of conversion means a September start aims at the 2027 season, which is the window you're preparing for anyway.

BY SEPT 1	Your decision. No pressure before it. Season winds down, your partner is back, and you've had the proposal for six weeks.
WEEK 1	Kickoff. Voice + partner profile scoped. Who counts as a good organisation for you, and who explicitly doesn't.
WEEK 1-2	Infrastructure warm. Match list approved. Domains warmed, mailboxes set up, your sign-off before a single email goes out.
WEEK 3-6	First batch sent. Testing what resonates. German vs English, and which angle - including Building Bridges.
WEEK 7-8	Best angle scales. First introductions booked. Real conversations land on your calendar, paced to your guide's capacity.

DAY 60

Target: 3 booked introductions - and a clear answer on whether this channel works for a brand like yours.

Cost per call, reply quality, fit - real numbers instead of a guess, before you commit anything to 2027.

Pricing

MONTHLY RETAINER	\$750 / month
Covers infrastructure - domains, mailboxes, deliverability	

PER BOOKED CALL	\$150 / call
Paid only when the call happens	

SETUP FEE	None
No upfront commitment	

TRANSPARENCY · COST & MARGIN

The \$750/mo covers our infrastructure cost. We make our margin on the \$150 per booked meeting, which means we only earn when you do.

QUALITY GUARDRAIL

Billable calls = organisations inside the approved match profile. We don't bill for anyone outside the agreed shape - including the agency type you told us to stay away from.

3-CALL WALKAWAY

Your first three introductions are your test drive.

If the quality isn't there, you keep the Partner Match Report and the domains, and walk - no contract, no further charge. Around **\$1,500 total** is what you actually risk to find out whether this pipeline works for you.

ONE NUMBER WE STILL NEED

On our call we got interrupted before you answered what one good partner is worth to you over the life of the partnership. That number - not this pricing page - is what decides whether the channel makes sense. Here's the maths ready for your figure:

Infrastructure, one month	\$750
10 booked introductions × \$150	\$1,500
Total to reach 10 real conversations	\$2,250

If you close 1 in 10 → cost per new partner ≈ \$2,250

One-in-ten is deliberately pessimistic - you close nearly everyone who takes a call with you today. At a 3× return, a partner worth more than roughly **\$7,000** over its life makes this channel pay. Worth less than that, and we should both say so before you spend anything.

Bring your number to the follow-up call and we'll run it properly together.

Why this fits .Cheyf

	PEER · NOT VENDOR Technical co-founder of Balkan Wanders, a DMC working the same region you do. The engine on this page was built from inside a Balkan DMC - not bolted on from a marketing agency.
	BUILT FOR A PREMIUM BRAND We throttle to your guide's capacity rather than blasting volume, and we filter out the price-driven agencies you don't want anywhere near your brand.

	EXCLUSIVITY While you're a client, we won't take on a new competing Bosnia & Herzegovina DMC.
	EASY OUT Worst case: you keep the Partner Match Report with 50 approved contacts, 3 free introductions, and the domains and mailboxes in your own name.

Next step

A short call in the first week of August - once your partner is back and you two have had time with this. We confirm what a good organisation looks like for you, run the maths on your number, and you decide by September. Nothing needs deciding before then.

→ **Pick a time below, or reply with what works.**
